## 2.9 UPTD Tax and Centime Duplex Markings

The Duplex Tax markings, issued in accordance with U.P.U. regulations, were intended to provide an understandable system for the collection of postage due to the Jamaica Post Office, by whom they were applied.

They were issued primarily for use on underpaid mail going overseas and as a standard unit of currency for exchange was essential, the Gold Centime was established, 5 Gold Centimes being considered equal to ½d Sterling. This assessment ensured that the correct fee was collected from the recipient of the letter and more important, that the correct amount of postage due was remitted to the Jamaica Post Office.

As these handstamps were applied to mail that had already been postmarked and inspected, it was thus not necessary to include the date in their makeup.

With one exception, they were composed of two circles or tandem marks, not necessarily of the same dimensions, known as the LEFT-HAND and RIGHT-HAND circles. The lone exception is Type D09k, which was comprised of two double rings.

The left-hand circle, again with the one exception, contained the TAX capital letter "T" at the top and curved below around the lower arc of the circle was the Colony name "JAMAICA". Type D9k was again the exception, with the Colony name "JAMAICA" curved inside around the top arc instead of around the bottom arc, with the TAX "T" in the center below.

The right-hand circle or double ring was composed of the word "CENTIMES" curved inside around the top, and the AMOUNT DUE figures in the center below.

### 2.9.1.1 UPTD-D09

	<p>A duplex rubber handstamp comprised of two single circles, each 17½ mm in diameter. In the left-hand circle is a large thick serifed capital letter "T" about 10 mm in height, and curved below the Colony name "JAMAICA" in small 2 mm serif caps, concluding with a period. In the right-hand circle is the word "CENTIMES", curved inside the top in 2 mm serif caps, and below in the center is the amount due in 3½ mm serif Arabic figures.</p> <p>Four values have been recorded, and others may exist. All are in violet ink.</p>

**2.9.1.4 UPTD-D09c**

Same format with two 21 mm diameter circles. Five ~~Three~~ values have been reported including 40 CENTIMES with some strikes showing a portion of the handstamp's rectangular holder. LEFT-HAND Circle - The capital "T" is serif, about 6 mm high; Colony name "JAMAICA" is curved below in 2½ mm serif caps minus the full point. RIGHT-HAND Circle - The word "CENTIMES" curved around the top in 2½ mm serif caps; Amount due is in low center below in 6 mm serif figures.

### 2.9.2 Re-Valuation of Sterling

The Pound Sterling was devalued by 30% (From \$4.03 to \$2.80) on 19 September 1949 (announced late on 18<sup>th</sup>), resulting in a corresponding increase in the value of the GOLD CENTIME and a new UPU exchange ratio, namely:

4 GOLD CENTIMES to be equal to ½d. STERLING.

7 GOLD CENTIMES to be equal to 1d. STERLING.

All existing duplex handstamps thus became obsolete.

Foster proposed a Theory ! Until this time duplex tax handstamps showed double the deficiency, i.e. the straight rate to be converted! Afterwards the handstamp showed the deficiency only and this had to be doubled and converted on arrival.

### 2.9.2.1 UPTD-D09I

The "T" marking seems to fit the description of the one listed by Lant as D6g (or Proud type UP35) even though Lant states that the diameter is 21mm and the one on this cover measures 21mm horizontally and 20mm vertically. I have not seen the 4D strike before. I believe the T and 4D strikes were made separately because if you look at the scan showing an enlargement of the strikes, you will see that when the T is upright, the 4D is tilted slightly to the left. Also, there appears to be a vague outline of the two handstamp frames, and the right side of the 4D frame appears to be larger than the "T" frame outline as defined by its left corners.

UPTD-D09I-04c\_19491018-  
a\_obv  
Ex K Moh

### 2.9.2.2 UPTD-D09d

A provisional handstamp having the same format but with circles of different sizes. It was apparently an unused duplex marking expressed in the old currency with the value only partly obliterated. Violet ink; only two values known.

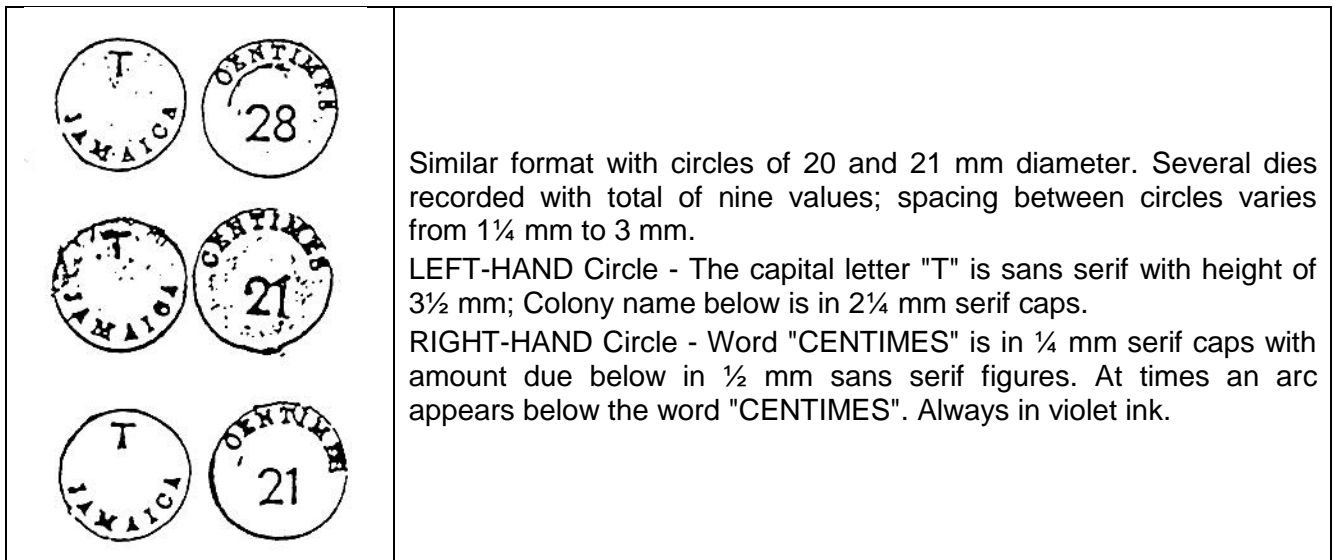

LEFT-HAND Circle - 19 mm in diameter with sans serif 3½ mm capital "T"; Colony name "JAMAICA" curved below in 2¼ mm serif caps.

RIGHT-HAND Circle - 21 mm diameter with word "CENTIMES" in 2½ mm serif caps, and the amount due in indistinct figures about 8 mm with either figure "4" or "7" superimposed.

TF	D11e					

	<p>04c 19 Feb 1951 Ex Sutcliffe</p>
	<p>14c Ex Dunbar The 14c, no there's no trace of a year. The closest I can get is after the issue date of the 1d blue-green (ie 25.10.51 or later), and a best guess of 52 or 53. I had a go at seeing if I could track down when Gene Autrey's address changed from Republic Studios to 920 Sunset Blvd, but couldn't get any precision out of imdb etc.. The month/day I make JY 16 (from the RH impression).  Should be 5d underpaid 2d = 14c</p>
	<p>21c Ex Dunbar On the 21c I can see a (5?)1, so 23.4.51. On the scan, the "1" runs from the lion's mouth through the upper dot on its forelimb. The 5 is barely there but if you zoom the scan, its upper part sort of curves round the claws of that limb. Hard to be completely certain about that 5 though. The stamp of course places it a little (ie after Feb 51), and I think, relatively speaking, that stamp wasn't so commonly used after '51, unlike the definitives.  Underpaid by 3d = 21c</p>

	D11j	21 C		10 Oct 1964	31 Dec 1965	

\* Looks suspect, as Foster original manuscript states 1965.

Also, an 11 CENTIMES value has been reported 26 Apr 1965, changed in manuscript to 21 CENTIMES.
